Student2: <https://github.com/Student2>

...

StudentN: <https://github.com/StudentN>

This document contains the Homework # of the Robotics Lab class.

Title of the Homework

1. We have addressed this first point by

- (a) creating the `file.cpp` in the <https://github.com/Student1/package.git> implementing this code

```
int main(argc, argv)
{
    return 0;
}
```

- (b) Launching the code with the command `$ launch` command will produce this output

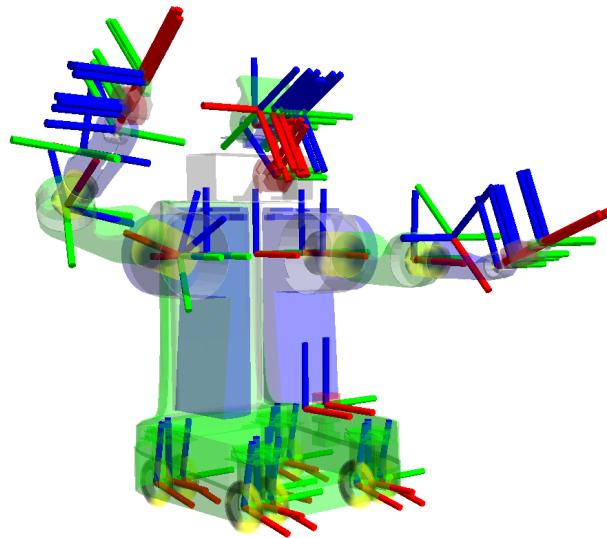

Figure 1: Caption

2. We have addressed this second point by

- (a) Implementing another code
